

Conservation Zones must protect Pittwater's environment and community

To the Mayor and members of Northern Beaches Council

We, the residents of the Northern Beaches Council area, believe the bushland landscape of the former Pittwater Local Government Area is its predominant feature, with the built form secondary, and that this must be maintained in the future Local Environment Plan and Development Control Plan.

We therefore call on Northern Beaches Council, in the former Pittwater Council area, to:

1. Rule out rezoning of C4 land to residential
2. Apply conservation zonings to properties where any significant environmental values or hazards are present
3. Create Scenic Foreshore Protection Areas from shorelines to ridgelines
4. Retain all Heritage Conservation Areas and investigate those proposed - but not yet implemented - by the former Pittwater Council.
