Transport for NSW

Wakehurst Parkway Improvements

Community notification

October 2026

Transport for NSW acknowledges the Traditional Custodians of the Northern Beaches on which we work and pays respect to Elders past and present.

The NSW Government is delivering improvements to Wakehurst Parkway between Frenchs Forest and Narrabeen focusing on safety and capacity for this key link in Sydney's Northern Beaches.

What work are we doing?

In October, we're continuing work on Wakehurst Parkway, between Trefoil Creek and Oxford Falls Road.

Key work activities include:

- rock breaking and stabilisation work
- earthwork
- utility work
- drainage work
- line marking and barrier relocation

When and where we'll be working

Work will primarily take place during standard construction hours from **7am to 6pm, Monday to Friday** and **8am to 1pm on Saturday.**

Some work will be undertaken outside of standard construction hours between **8pm and 6am**, **Monday to Friday**.

This work will include line marking, barrier relocation, rock breaking and vegetation clearing activities.

Nearby residents will be contacted in advance of work taking place. Noisy work will be completed before midnight where possible.

Work is subject to change, pending weather and site conditions. Refer to map overleaf for work location.

What will this mean for you?

While we carry out this work, you may notice:

- workers and vehicles moving around the site
- traffic controllers and signage directing road users
- temporary lane closures and reduced speed limits during and outside of standard hours
- noise from machinery and equipment

Managing our impacts

Some work activities will require the use of machinery which generate noise, light and vibration. We'll implement the following controls to minimise the impact to the community and environment:

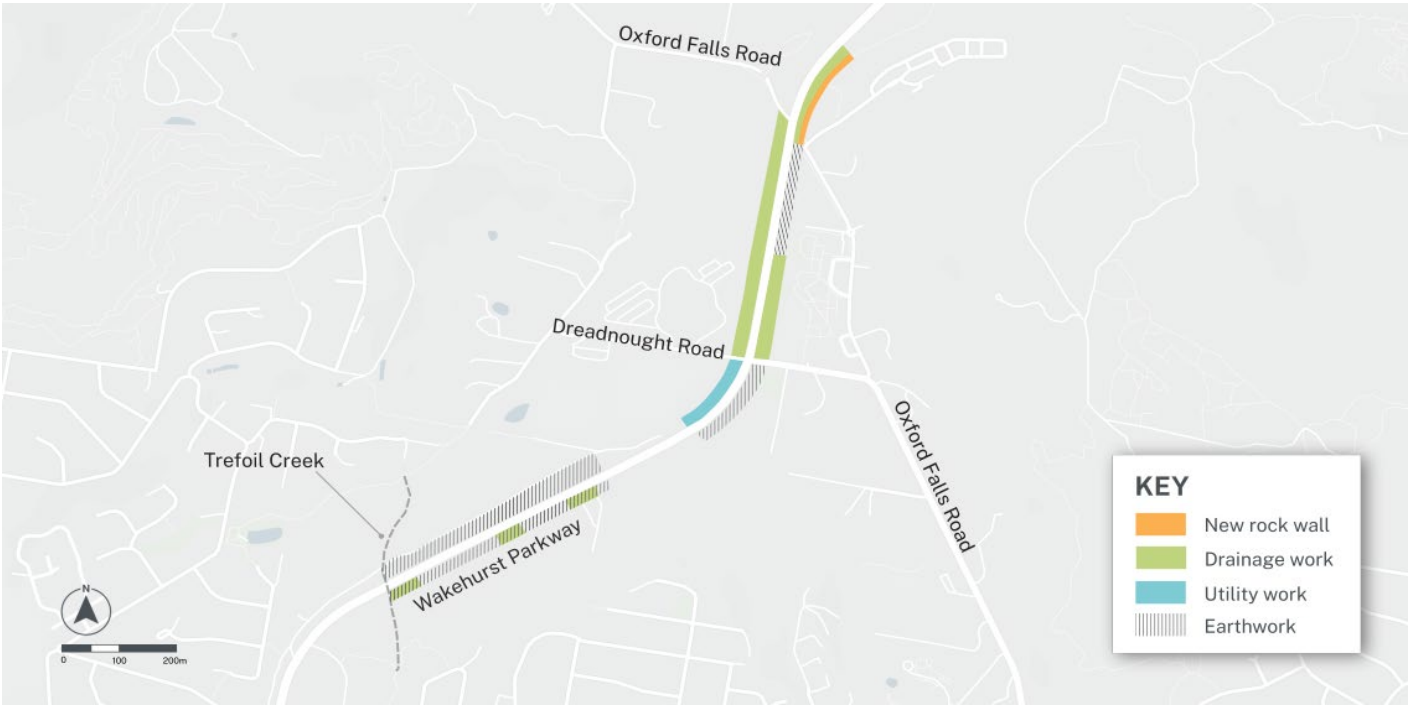

- use non-tonal reversing beepers
- manage dust by watering down exposed areas during earthwork
- minimise light spill through targeted lighting
- complete oversize deliveries later at night when traffic volumes are lower
- night work to minimise traffic impacts
- keep affected residents and businesses informed ahead of higher-impact activities.

Our equipment

Work will involve the use of the following machinery and equipment:

- delivery vehicles (heavy vehicles, light vehicles and 'pick and carry' cranes)
- earthwork machinery (excavator, profiler, roller, grader, tipper, vacuum truck)
